***For Immediate Release***

## **Delta Rigging & Tools Named Primary Distributor of Breakthrough Limpet Technology Fall Protection and Climb Assist Solution**

*Delta Rigging & Tools to market Limpet's Total Height  
Safety Technology in North America and Australia*

**PEARLAND, TX—Jan 26, 2012** — Delta Rigging & Tools, Inc. ([www.deltarigging.com](http://www.deltarigging.com)), one of the largest providers of lifting and rigging products and related services in the United States, today announced an agreement with Limpet Technology Limited as the primary distributor in North America and Australia in the Oil and Gas, Wind Power, Energy Generation, Construction, and Entertainment sectors.

The Limpet™ is a multi-functional height safety system that provides five key functions in one simple, reliable, and cost-effective system that offers significant cost of ownership benefits:

- Climb assist function increases productivity and reduces expensive downtime
- “Always-on” fall prevention technology prevents accidents that cost lives, money and reputation
- Market-leading rescue, evacuation and work-positioning technology
- Reduced maintenance and servicing requirements
- Minimum 25-year lifespan

*more*

The Limpet was recently introduced at Delta Rigging & Tools' facility in Angleton for safety and operations personnel from Delta's client base to see first-hand. The demonstration provided the opportunity for customers to actively participate and experience how the technology eliminates the risk of an accidental fall, provides up to 90% reactive climb assist, and provides both emergency escape as well as remote rescue capabilities if a worker becomes incapacitated. This event proved that current industry safety standards can continue to be improved by the revolutionary Limpet Technology.

"We were able to demonstrate the product for the first time in North America at our facility in Angleton, Texas back in December of last year," said Eric Johnson, VP of Marketing for Delta Rigging & Tools. "We were honored to have Mike Parnell, CEO of Industrial Training International and Vice Chair of the ASME B30 standards setting committee for cranes and rigging, as one of our guests. After testing the device himself, Mike commented that the Limpet was a 'marvel' that would change working at height safety across multiple industries.

"We're excited to be the primary vendor for Limpet's breakthrough technology in North America and Australia, across a range of industries that need a better fall protection solution than what they are forced to utilize today," continued Johnson. "The Limpet is a game changer, and every company that has employees working at height needs to evaluate it to better protect their workers."

John Reid, Chairman of Limpet Technology added, "Limpet Technology is delighted to have appointed Delta Rigging & Tools as their primary Distribution Partner. It is great to have such a well-respected company and market leader representing our brand and product in North America and Australia. The benefits of working with Delta in the future across a range of activities and industry sectors is paramount to continually enhancing design and functionality of the Limpet™, which will benefit workers' safety in a number of environments."

### **About Delta Rigging & Tools**

Delta Rigging & Tools, Inc. (DR&T) is the largest US provider of rigging and lifting products and services. DR&T offers a complete portfolio of lifting solutions, including hoists, winches, wire rope, wire and synthetic slings, accessory parts, and hardware as well as testing, inspection, and field services. DR&T serves both domestic and international customers through 13 sales and service facilities and 2 primary distribution centers located around the country. The company provides complete lifting and rigging solutions and support for a diverse range of markets, including Oil & Gas production and distribution, Energy and Power-Generation, Mining, Transportation, Heavy Manufacturing and Construction.

Founded in December, 2004, when several of the leading industrial rigging and lifting companies across the U.S. merged together, Delta Rigging & Tools continues to grow rapidly

by providing its customers in these and other industry segments with the highest possible levels of *Safety, Service, Quality* and *Value*.

**About Limpet Technology**

The Limpet™ is the world's first fully integrated multi-functional height safety system, and was developed to provide five key work-at-height safety functions in one total solution. Incorporating fall prevention, reactive Climb Assist, rescue, evacuation and work positioning all in one integrated system, the Limpet™ redefines height safety by providing the simplest, safest and most comprehensive method of ascending and descending high structures.
